

Individual Website Project Brief

Your task is to create a 1-page website using the guide on the following page to help you.

You will make sure that your version of the website matches the image on the following page as close as possible.

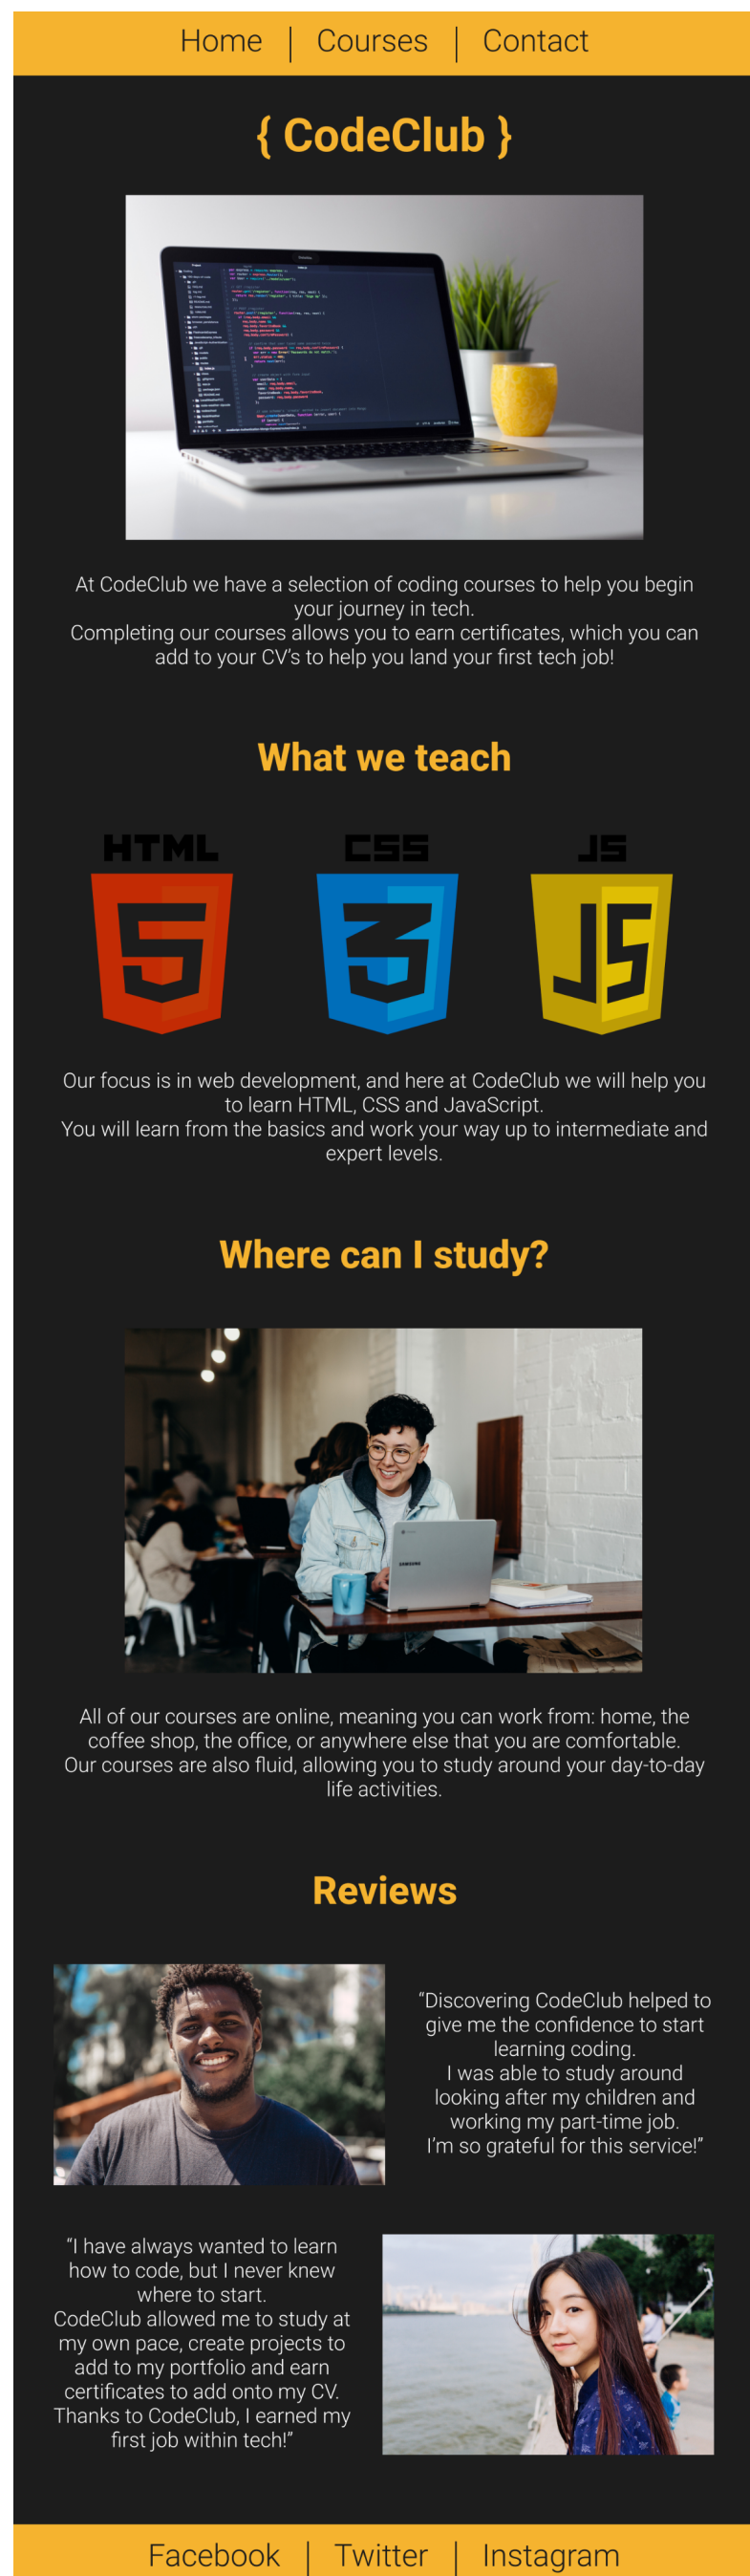

The images will be provided to you as will the colours you need to use.

You will have to obtain the correct font using fonts.google.com

Colours

| | | |
|--------------------------------------|---------------------------------------|--------------------------------|
| 1C1C1C <small>Eerie Black</small> | F5B32F <small>Honey Yellow</small> | FFFFFF <small>White</small> |
|--------------------------------------|---------------------------------------|--------------------------------|

Individual Website Project Brief

Navbar will contain empty links

<h1> header

image1.jpg (found in folder)

<p> paragraph

<h2> header

image2.png, image3.png,
image4.png (found in folder)

<p> paragraph

<h2> header

image5.jpg (found in folder)

<p> paragraph

<h2> header

image6.jpg (found in folder) next
to a <q> quote

image7.jpg (found in folder) next
to a <q> quote

Footer will contain empty links

Individual Website Project Brief

What is an empty link?

An empty link is a link that takes the user nowhere.

They are only typically used when the developer is building the website to make sure it looks as intended, they would never be used in the final build.

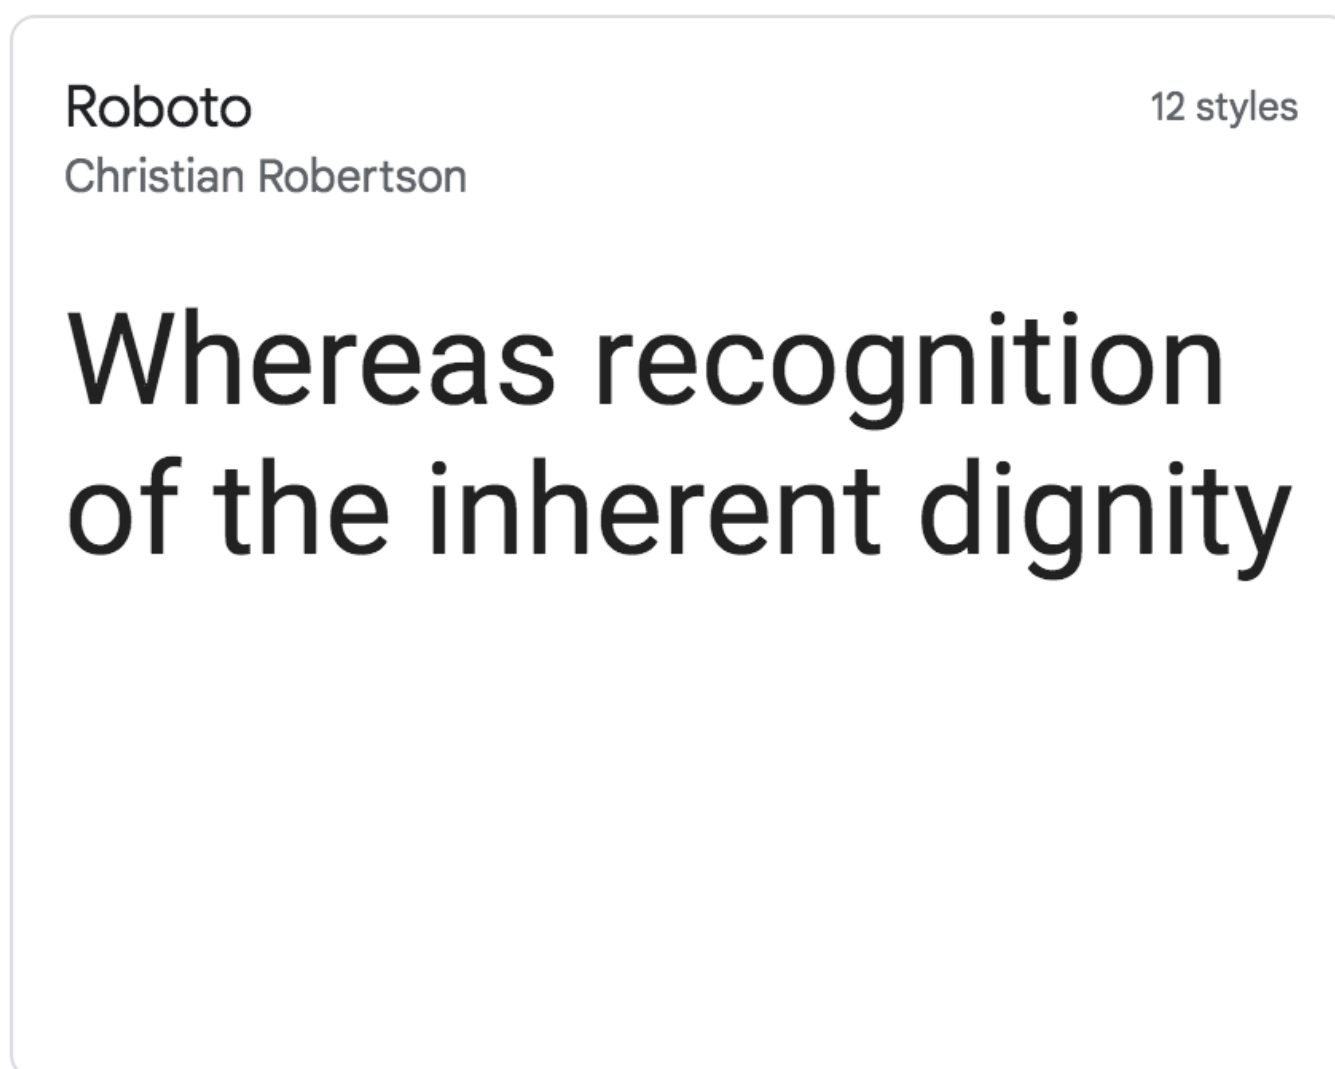

```
<a href="#">Home</a>
```

The # will not take the user anywhere, it allows you to create a temporary link for your page.

Individual Website Project Brief

What font do I need to use?

You will be using the font Roboto as it is clear to read and available to obtain via fonts.google.com

If you are having trouble with adding the font into your code, please ask your tutor to show you.
